ABOUT SMIRDEX

Founded in 1981, Smirdex is a leading company in the field of manufacturing premium quality abrasives for a wide range of applications.

Located in Northern Greece, at a total area of 32,000m², the premises occupy more than 15,000m² accommodating the two sophisticated makers, the conversion plant and the several modernized warehouses as well as the headquarters of the company.

With reference to its Foundation as a well-structured family business, and with the continuous efforts of the fully qualified staff, the company has been progressively led to growth and absolute alignment with top quality industry standards, via the selection of quality raw materials, the certified production process, and the development of innovation through specialized research.

OUR MISSION

Our clear vision is to provide the international market with a wide range of top-quality abrasive materials that will meet the evolving and demanding needs of all professionals.

Focusing our commercial activity on the international market, Smirdex exports 85% of its sales in more than 76 countries worldwide, through its network of dealers and associates, while the remaining 15% is distributed to the internal Greek market.

We export to 76 countries all over the world

WORLDWIDE PRESENCE

MISSION

PRODUCTION

There is an integrated philosophy behind Production. Smirdex invests in three parameters in order to deliver high-tech and top-quality products.

The first parameter is none other than the production equipment itself. By constantly modernising our machines and systems, we are increasing our production volumes, while ensuring consistency in top-quality products and optimal conditions for our staff.

The second parameter is the company's human resources, that are fully trained and skilled, always in touch with the latest equipment and materials technology.

The third basic parameter is the raw materials' selection and approval. Through a network of certified suppliers, we ensure the top-quality raw materials that conform to strict technical specifications. The quality control of all incoming goods is done in every delivery and is thoroughly inspected by our specialized personnel to ensure the use of approved, high-quality raw materials.

PRODUCTION

- ✓ **ON-SITE SCANNING CONTROL SYSTEMS**
- ✓ **SPECIALISED PERSONNEL**
- ✓ **QUALITY CONTROL APPROVAL**

RESEARCH & INNOVATION

Smirdex is always committed to finding sophisticated solutions and manufacturing new innovative products, combining specialised and detailed research with long experience in the field of abrasives.

We create products that can meet all the evolving needs of modern professionals.

Market feedback and study is crucial for developing specialised products and improving even more our current production lines and procedures. All new products are tested in the company's high-tech laboratories by our scientific staff and, sometimes, academic research is taken over by the university and other educational institutes.

**LEADING THE INDUSTRY
TO INNOVATION**

HIGHLY-QUALIFIED RESEARCH STAFF

Our goal is to fully meet the needs of our customers. Among other things, this involves two key processes: Investing in Innovation, and being in open communication with the professionals in the field, listening to their concerns and needs. Every product bearing the Smirdex signature is created under these conditions.

LOGISTICS

Once the production process and the quality tests are finished, the products are headed to Smirdex warehouses, where they become part of Logistics and Supply Chain Management. An integrated system of storage and quick customer supply services supports the global sales department, providing ready-to-ship products the moment an order is placed.

The Logistics department of Smirdex is an important and integral cog, both for the smooth operation of the production line and for the optimal customer service and supply chain of Smirdex globally.

SOCIAL RESPONSIBILITY

Smirdex is an integral part of Society itself and, for that reason, it cannot remain idle, considering all the responsibilities stemming from its social consciousness. And this is not just about narrow corporate frameworks. Smirdex has always been a helper of any effort that can create better conditions for vulnerable social groups.

Just as we take care of the safety, working conditions and health of our employees, we want the same for every person in need.

ENVIRONMENTAL RESPONSIBILITY

Environment is respected in all organisational procedures. From the product planning stage to the shipment of orders, environmental issues are strictly taken into consideration. An industry with eco consciousness faces several challenges, both at the theoretical level of design and in the practice of the industrial activities.

Therefore, Smirdex sets and follows three major parameters, considering: the factors of industrial production, the product itself, and the process of product usage by the customer.

APPLICATIONS

750 CERAMIC NET

The 750 Ceramic Net delivers outstanding results on demanding surfaces and repair applications.

Thanks to the ceramic grains that it contains, Smirdex net offers a superior performance and fast cutting results on various solid surface materials and primer sanding applications.

The net fabric structure permits maximum absorption of sanded particles, thus providing dust-free sanding with cleaner surfaces, where less time and effort are needed for cleaning up. It offers a much healthier working environment as it protects the worker from the dangerous sanding particles.

MORE

750 CERAMIC NET

DUST-FREE SANDING

Thanks to its net fabric structure, the 750 Ceramic Net Velour discs achieve maximum dust absorption, providing a much cleaner and healthier working environment.

MAXIMUM PRODUCT LIFESPAN

The net structure prevents fast clogging, compared to conventional paper discs, thus prolonging the product's lifespan.

750 CERAMIC NET

CERAMIC GRAIN (CER)

A tough and hard grain with excellent self-sharpening features, thanks to its micro-crystalline structure. Ceramic Line is suitable on Clear Coats, Primers, Putties, Hard Composites, Hard Wood and Metal surfaces.

- ✓ Fast cutting results, thanks to the sharpness of the grains
- ✓ Self-sharpening edges with significantly longer lifespan
- ✓ High removal rates and increased performance

Applications	Automotive, Composites

740 CERAMIC LINE

The 740 Ceramic Line offers fast cutting products with excellent performance that last significantly longer than the conventional abrasives, thanks to the ceramic grains that it contains.

The Ceramic grains of this line provide long-lasting sharp edges, offering better finishing results on the treated surfaces. The 740 Ceramic products are perfect for sanding any type of material, such as scratch resistant varnishes and e-coats, primers and composites, eliminating the need for specialty products.

Applying increased working pressure becomes easier for the user, when sanding with 740 series, thus providing high removal rates. Moreover, the hole pattern contributes to a dust-free environment, protecting the worker from the dangerous sanding dust particles.

740 CERAMIC LINE

IDEAL FOR AUTOMOTIVE REFINISH

The 740 Ceramic Line Velour discs are ideal for the demanding surfaces of the automotive industry, due to their overall structure, the responsive adaptability, the Ceramic Grain Technology and their efficiency providing a top-performance refinishing solution.

CERAMIC GRAINS STRUCTURE

The self-sharpening properties of the multi-crystalline ceramic grains' structure provide maximum durability and fast stock removal rates.

- ✓ Fast cutting results, due to the sharpness of the grains
- ✓ Self-sharpening edges with significantly longer lifespan
- ✓ High removal rates and increased performance

740 CERAMIC LINE

SPECIAL OPEN COATING

The high quality grip backing offers excellent adhesion to the pad.

The ceramic grain properties combined with the open stearate surface structure, optimises the lifespan and the efficiency of the product.

270 WATERPROOF

The 270 waterproof series consists of high-quality waterproof sanding abrasive papers.

Considering the car body repair industry, it is suitable for wet sanding lacquered surfaces between coats.

The silicon carbide grains provide excellent finishing results and the flexible paper, with 30% latex content, permits sanding difficult-to-reach surfaces. It is highly recommended for removing the orange peel defects and for spot mark repair.

The supreme quality of the micro grits is visible when sanding varnished surfaces, where the quality and roughness of the treated surface has great uniformity.

SCAN FOR
MORE

270 WATERPROOF

The flexible backing paper makes 270 sheets suitable for hand sanding of curved and angled surfaces.

The use of a sanding block is recommended so as to get a uniform surface with a smooth sanding pattern.

PRECISION MICROFINISHING

A unique solution for several types of glass and electronics smooth finishing applications.

SPOT REPAIR

The 270 Waterproof 34mm Velour discs are ideal for correcting the orange peel spot defects of varnished surfaces with outstanding precision.

275 WET/DRY

The 275 waterproof sheets can be used manually either wet or dry. They have a high stock removal rate and extremely long lifetime.

The Aluminium Oxide grains provide fast cutting results, whilst the middle weight paper makes it highly adaptable to contours and shapes. It is ideal for more demanding sanding, where higher applied pressure is needed.

It is suitable for sanding down coatings and flattening of body and primer fillers. It is also recommended for the removal of paint runs, orange-peel effect and dust inclusions.
